

## Past Conference Report

“3<sup>rd</sup> International Conference on Materials Science and Chemistry” was successfully done on **July 23, 2020** webinar hosted by Allied Academies with the theme of “**Innovations and Chemical Applications in Materials Science**”.

**Euro Materials Chemistry 2020** was marked with multiple sessions, keynote presentations and panel discussions. We received active participation and generous response from organizing committee members, scientists, young and brilliant researchers, business delegates and talented communities who made this Conference as one of the most successful and productive events in 2020 from AAC.

**The meeting was carried out through various sessions, in which the discussions were held on the following major scientific tracks:**

Materials Science and Engineering

Materials Chemistry

Organic and Inorganic Materials

Nanomaterials

Composite Materials

Biomaterials

Computational Materials Science

The conference was initiated with the Excellencies of the keynote forums:

**Title:** From hydrogen to graphene with twin physics

**Anna C M Backerra**, Stichting de Schat, The Netherlands

**Title:** Characterization techniques for metal additive manufacturing

**Prabir K Chaudhury**, Education and Consulting LLC, USA
